WestTel brings *Freedom* to Cayman.

George Town, Grand Cayman – The new '*Freedom*' Broadband PC Card from *WestTel* conveniently provides you with the highest performance broadband wireless internet service anywhere, anytime on Grand Cayman.

Simply plug the *Freedom* Broadband PC Card into your laptop and start surfing. *Freedom* Broadband is the ultimate business tool for people on the move, allowing you to email files or pictures to clients, or simply access information back at the office quickly and easily from anywhere on the island.

Its innovative design means that field based staff can simply insert the card into the PC Card Bus / PCMCIA slot on a laptop and they're ready to connect to the Internet, anywhere within *WestTel's* network coverage area. There's no need for additional power supplies or cables, making it truly portable and easy.

'We're excited about this product which offers our customers an alternative to the often frustrating limits set by other means of connecting to the internet whilst away from the office or home. The *Freedom* card offers real Broadband speed of up to 1M. It's all about convenience these days, people demand more information faster and business often has to take place away from the conventional office set-up', says Calvin Morton (*WestTel* VP Sales).

WestTel's Freedom PC Card will retail at CI\$ 220.00 per unit and will be available at all *WestTel* Customer Service Centers from mid-March.

WestTel Limited is a provider of voice, data, internet and professional services to residential, government and corporate customers across the Cayman Islands. For more information call the customer service centre on 745 5555.
